Project Information

Project Title

Drummond Connector (Trail 63) Storm Damage Repairs

Number of Trail Miles

about 1/2 mile

Project Description

- For maintenance, include a concise statement of the type of maintenance activities and the type of grooming equipment used.
- For major bridge rehabilitation, describe the proposed construction items to rehabilitate the bridge.
- For trail rehabilitation, describe the repair and renovation activities necessary to improve the trail for user safety.
- For development, describe development activities and structures to be constructed.
- For development of intensive use areas; describe the need and expected use and method of operating and maintaining the facility.

On July 11, 2016 a heavy rain storm impacted the Drummond Connector Trail (Trail 63). The Drummond Connector Trail is located up on a high old railroad grade that had old deteriorating culverts. The volume of water and the debris that was pushing into the culverts caused them to fail and sent water gushing over the top of the trail next to Pot Lake and east down and along the trail tread, which eroded away approximately 1/4 to 1/2 mile of the trail and blow out several culverts. The trail now has a ravine that is about 50+ feet deep with no potential location to re-locate the trail due to other wetlands and small lakes in the adjacent area. The best option is to reconstruct the trail at a gentle gradual grade and improve the drainage to prevent future trail washouts like this one. The Forest Service engineers have estimated a total cost of \$51,000. Bayfield County will incur an additional administrative expense of approximately \$4,464.00. The Forest Service will be contributing approximately \$31,000 towards the repairs, but needs an additional amount of approximately \$25,000 to get the repairs done by December 2, 2016. The Drummond Connector is the main connector trail between the towns of Drummond and Grandview. Fixing this trail to ensure the economic viability of these tourism based communities is critical. This project will be conducted in a cooperative manner under a Challenge Cost Share Agreement. Total amount of funding requested: \$25,363.

Estimated Cost

Maintenance	Acquisition	Insurance	Development	Bridge Rehab.	Trail Rehab.	Total Estimated Cost
					25,363.00	25,363.00
